TEXAS RABBIT WORKS

No trip to Texas is complete without a stop at the Texas Rabbit Works Museum, the last rabbit processing works in Australia. It tells a fascinating tale of the rabbit plague that once dominated this area and the rabbit industry that saved Texas from the grips of the Great Depression. By trapping and selling rabbits for export to America and England, Texas turned the district's rabbit problem into an opportunity!

FISHING

Keen anglers, take note: there's a reason the Goondiwindi Region is regarded as one of the best freshwater fishing areas in Queensland - and Texas has some of the most picturesque fishing spots you'll find. The Dumaresq River flows within a few hundred metres of the town, and you couldn't wish for a better place to while away a few hours 'wetting a line'. Our waterways are positively brimming with Murray Cod, Yellowbelly and even freshwater catfish. The Texas Fishing Club has gone to a lot of effort, along with some government assistance, to restock the river with Golden Perch and Murray Cod fingerlings.

Don't forget, there are numerous reserves with excellent fishing and camping areas within easy driving distance of Texas.

For bait and fishing supplies, visit Fords Store or Metro Service Station. Local Hardware stores Mitre 10 and Wilshire & Co also stock tackle and other fishing equipment.

Before casting off, you'll want to make note of fishing regulations regarding licensing, limits and seasons for both Queensland and New South Wales.

TEXAS & DISTRICT BOWLS CLUB

No need to rest your bowling arm when you holiday in Texas! Roll into the bowls club and enjoy a round on the green. Work up an appetite on the green, then enjoy lunch or dinner with the locals.

POINTS OF INTEREST

BEACON LOOKOUT

Only a five-minute drive to the east of the town on the Stanthorpe - Texas Road, the Beacon Lookout offers impressive, panoramic views over the Dumaresq River valley. Built by Texas QLD Inc., on land donated by the Kemp family.

CUNNINGHAM CROSSING

In 1827, explorer Allan Cunningham crossed the Dumaresq River near the present site of the Cunningham Weir.

OLD TEXAS

There are just a few remains of the 'original' Texas on the banks of the Dumaresq River. The town was moved to the present site after the 1890 and 1921 floods.

SILVER SPUR

Sulphide minerals of zinc, lead, silver, copper and some amounts of gold have been found at Silver Spur. In 1893, Edgar Hall took over the old Texas reverberatory furnace and started mining systematically. This operation ceased during WWI, and then continued successfully until 1921 (with some sporadic production until 1976). A railway survey to connect Texas and Silverspur was completed in 1912, but the line was never laid.

SMITHFIELD

The name was derived from two English settlers, Smith and Corfield, and was later changed to Smithlea by the postal authorities. Cheese-making was a successful enterprise in the area, supplying the tin miners in Stanthorpe.
